Omega-6:3 balance

Unbalanced 26:1

The Omega-6:3 balance is too high. Increase the Omega-3 intake to improve the results and to reach balance.

Protection value

Insufficient 0%

The Protection value is insufficient. A daily intake of BalanceOil in the recommended dosage for 120 days will increase the diet's protective capacity.

Omega-3 index

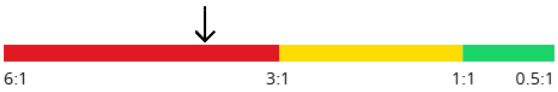

Insufficient 3.4%

The Omega-3 index is insufficient. Increase the Omega-3 intake to reach an optimal Omega-3 index.

Mental strength

Insufficient 3.8:1

The Mental strength value is insufficient. You need to ensure a marine source of Omega-3 in the diet to reach an optimal Mental strength value.

Cell membrane fluidity

Insufficient 10.6:1

The Cell membrane fluidity is insufficient. To achieve good membrane fluidity, increase Omega-3 and reduce saturated fatty acids in the diet.

Arachidonic acid (AA) index

High 12.7%

The AA-index is high
